# THE TEQUILA DISTILLATION PROCESS

## KNOW YOUR TEQUILA!

*Tequila cruda (that salt, lime, shot, oblivion thing)... has its place,  
but whatever tequila you're sipping - even if it's a blanco -  
it actually took a minimum of eight years to get to the glass.  
Time and respect should be paid.*

BLANCO	Blue agave spirit in its purest form, clear & typically un-aged.
REPOSADO	Blue agave spirit aged in wood barrels between 2 - 12 months.
AÑEJO	Blue agave spirit aged in maximum 600L barrels between 1 - 3 years.
EXTRA AÑEJO	Blue agave spirit aged in maximum 600L barrels for more than 3 years, and longer.
MEZCAL	Any type of agave distillate made inside the nine states covered by the denomination of origin. Made in a more traditional and hands on method.

## MEZCAL

MEZCAL

Mezcal, pronounced “Mescal” is a distilled spirit made from fermented agave. Where Tequila is always made from blue agave, Mezcal can be produced from up to 28 varieties of agave (including blue agave) which results in a huge range of flavour profiles, often with a smokiness, and are made around the city of Oaxaca.
